

Product Data Sheet

HB-371 SLICK-EM FOOD-GRADE BELT LUBRICANT NOW "KOSHER APPROVED"

DESCRIPTION:

- Synthetic-based lubricant developed specifically for the use in food plant ovens
- Provides excellent adhesion, penetration and lubrication qualities for all types of oven belts to include steel, stainless steel, rubber and Teflon
- Spray on to the belt with manual sprayer or automatic application system
- Forms a thin, dry coating that provides superior anti-friction and anti-seizure properties even under high temperature and extreme pressure conditions
- Dries to a non-tacky finish to allow separation of the food product from the belt
- Provides up to 24 hours of protection depending on temperature settings
- Withstands water, oils, alkalis and most acids
- Dilution ratio range: High heat 1:5 – 1:10, Low heat to no heat up to 1:50
- All components comply with FDA Regulations, CFT Title 21, paragraphs 175.300, 175.105, 176.170 and 176.180 for use applications for packaging of food where there is incidental contact
- Certified Kosher by the Chicago Rabbinical Council

PROPERTIES:

Form	Liquid
Color	Clear, water-white
Storage Stability	Stir/Agitate before use
pH	7.3
Flash Point	Non-Flammable

SAFETY:

Label use directions should be followed carefully. OSHA Material Safety Data Sheet available.

APPLICATION:

Specifically designed for use on food plant conveyor ovens. Spray on the belts and allow to dry before beginning the production cycle.

Conveyor chains	Kiln cars
Oven chains	Glass-making machinery
Food machinery	Roofing machinery
